SUMMARY

Dedicated Web Developer skilled in designing and developing responsive web applications with expertise in front-end and back-end technologies. Proven ability to collaborate with cross-functional teams, manage tasks efficiently, and deliver innovative solutions. Enthusiastic about learning new technology and contributing to dynamic projects in the tech industry.

SKILLS

Technical:

- **Front-end:** React, Bootstrap, DaisyUI, Tailwind CSS, CSS3, HTML5
- **Backend:** Node.js, Express.js, MongoDB, Firebase
- **Design Tools:** Figma, Photoshop
- **Development Tools:** VS Code, GitHub

PROJECTS

1. miSourabh (Portfolio Website)

Technologies Used: React, Tailwind CSS, HTML5, CSS3

Description: A personal platform that showcases my educational background, technical skills, and professional journey as a web developer. It serves as a hub for potential employers and clients to explore my projects and expertise.

Major Features:

- **Interactive UI:** The website is fully responsive. Built using React, providing a smooth and engaging user experience with dynamic content loading.
- **Project Showcase:** A dedicated section where I present detailed information about various projects, including technologies used and challenges faced.

2. Recommendo (Product Query and Recommendation Website)

Technologies Used: React, Node.js, Express.js, MongoDB, Firebase

Description: Recommendo is a platform where users can submit their product queries and receive product recommendations from peers. It facilitates informed decision-making by leveraging crowd-sourced suggestions.

Major Features:

- **User Interaction:** Users can submit queries for product recommendations and provide suggestions based on their experiences.
- **Real-time Data:** Integration with Firebase to enable real-time updates and interaction between users.
- **Database Management:** A backend built with Node.js and MongoDB to store and manage user-submitted queries and recommendations efficiently.
